

INFORMATION FOR NEW CLUB ACCOUNTS

SYNOPSIS

This document provides general information regarding club accounts, how they are obtained, limitations on use, and where to find additional information.

NEW ACCOUNTS

Clubs will be given **one** Central UNIX account for support of club Web pages, **one** OpenMail account, and **one** entry in the campus directory server which will redirect mail to the club OpenMail account.

(If desired, mail can in turn be forwarded from the club's OpenMail account to an individual's mail account via OpenMail's auto-forwarding feature).

ELIGIBILITY AND CLUB ACCOUNT NAMES

To be eligible, the club must be currently chartered. The club Advisor must sponsor the account, and the Director of Student Life (or designee) must authorize the account. Club account and email aliases are derived from an official list provided to ITS by Student Life, and cannot be altered except through Student Life.

DISK SPACE

Each Central UNIX account will be allowed a maximum of 6MB of disk space (2 MB for main account and 4 MB for Web pages; no exceptions). Each OpenMail account will be allowed a maximum of 10MB, no exceptions.

MODEM ACCESS

The Club's Central UNIX account cannot be used to log in to a Cal Poly modem pool. Persons using this account remotely would have to connect to the modem pool using their personal login ID; they could then connect to a Central UNIX machine (e.g., polylog1) to log in to this account to do work.

CHANGES

Use the Club Account form provided by the ITS Help Desk to change passwords for OpenMail or Central UNIX. For other club changes (name of club, President, Advisor, etc.), see Student Life.

USING YOUR CLUB ACCOUNT

To get the best use of your account, please refer to the documents referenced below.

<http://www.calpoly.edu/~ias/userguides/CentralUNIX/>

On-line versions of User Guides that apply to Central UNIX. In particular, the "Club

Account Management on Central UNIX" user guide (AIX50202) provides information on how to perform specific functions within a club account including setting up club email aliases.

<http://www.calpoly.edu/~usspclan/di rserv/>

Information about the Directory Server including who to go to to change data it contains.

<http://www.calpoly.edu/computing/computing.policies.html>

University Computing Policies that apply to all users including club accounts.

<http://www.calpoly.edu/~www/>

Help on setting up web pages within an account.

<http://email.calpoly.edu/>

OpenMail documentation, how-tos, and access to the OpenMail Web client.

Introduction to UNIX

A comprehensive beginners guide to Central UNIX and UNIX systems in general. Available from El Corral Bookstore publications (portions contained within the on-line user guides listed above).
