

media:scape Collaboration Tools in Poly Canyon Village Knowledge Center

media:scape is furniture and technology merged to help students collaborate, share ideas and learn more effectively. Through the integration of furniture and technology, **media:scape** is reshaping the way students collaborate in a connected world.

media:scape boosts collaboration across the table or across the globe by transforming classrooms, libraries or social spaces, connecting students, and sharing information seamlessly in dynamic new ways.

Most collaborative spaces today support leader-led presentations where information is controlled and shared by one person at a time. **media:scape** removes these barriers and democratizes how people access and share information by allowing all participants to contribute their ideas equally, quickly and seamlessly.

How it works

media:scape was designed for a “walk-up and connect” experience:

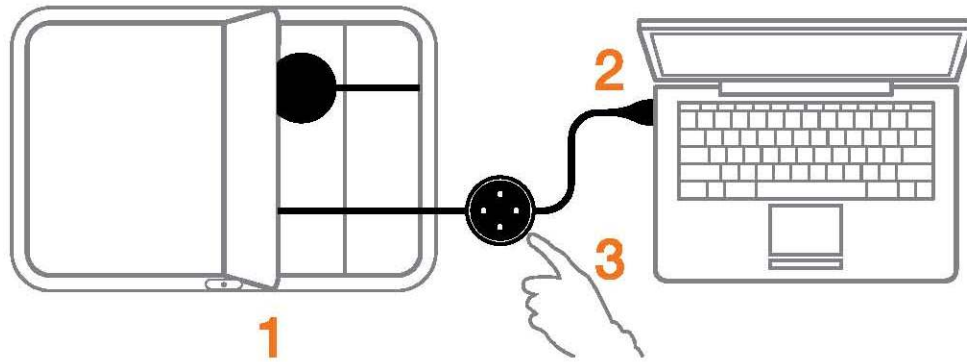

Open the media well and remove a Puck™

Connect the Puck™ to your laptop

Share what's on your laptop by pressing the Puck™

media:scape™

Open. Connect. Share.

- 1. Open** the media well and remove a Puck™
- 2. Connect** the Puck to your laptop (the Puck will turn white)
- 3. *Share** what's on your laptop by pressing the Puck (the Puck will turn green)

* You may need to press **fn** + **f4** to show your information on the monitor
