Puzzle of the Week
Jan 28-Feb 4, 2011

Calculate
\[ \sum_{i=1}^{\infty} \sum_{j=1}^{\infty} \frac{i^2 j}{5^i (j5^i + i5^j)} \]

[Hint: Write \( S + S \) is a clever way, then find and make use of a formula for \( \sum_{i=1}^{\infty} \frac{i}{5^i} \)]

Solutions should be submitted to Morgan Sherman:
Dept. of Mathematics, Cal Poly
Email: sherman1 -AT- calpoly.edu
Office: bldg 25 room 310

before next Friday. Those with correct and complete solutions will have their names listed on the puzzle’s web site (see below) as well as in next week’s email announcement. Anybody is welcome to make a submission.
