

Employment

Employment Opportunities

For all available job openings, visit jobs.calpoly.edu. To apply, go online and complete the application form. For help, call Human Resources at ext. 6-2236.

There are no new listings at this time.

Faculty Employment Opportunities

Visit jobs.calpoly.edu for current openings, further information and how to apply. For assistance, call Academic Personnel at ext. 6-2844.

There are no new listings at this time.

Corporation Employment Opportunities

Cal Poly Corporation is a separate entity operating in concert with the university to provide a diverse range of services and resources to students, faculty and staff. View all available job postings or apply at <https://www.calpolycorporationjobs.org/>. For assistance, contact Human Resources at ext. 6-1121.

There are no new listings at this time.

ASI Employment Opportunities

Candidates are asked to visit <https://www.asi.calpoly.edu/discover-asi/work-for-asi/> to complete an ASI application and apply for open positions. For more information, visit the ASI Business Office in UU 212 or call ext. 6-5800.

There are no new listings at this time.

Employees Can Use On-Campus Saliva-Based COVID-19 Testing Program

All campus community members, including state, ASI and CPC employees, can now access Cal Poly's saliva-based COVID-19 surveillance test at the Performing Arts Center and Poly Canyon Village testing sites. The university transitioned its ongoing testing program to saliva-based testing to because it is faster, more efficient and easier than nasal swab testing and will allow the university to administer significantly more asymptomatic tests — strengthening efforts to slow the spread of COVID-19 on campus and in local communities. Employees should continue to visit

<https://coronavirus.calpoly.edu/employee-testing> to make appointments. Follow the steps on the webpage to also obtain a six-digit Registration ID at least an hour before each appointment. Bring your Registration ID number, a photo ID and a water bottle (if you have one) to each appointment. The saliva samples will be taken to the Cal Poly SARS-CoV-2 Testing Lab to be analyzed. The university's saliva-based surveillance test is not a diagnostic test, so results cannot be provided at this time. However, if a diagnostic follow-up test is recommended following the saliva test, employees will be contacted by a medical provider with information on how to obtain a diagnostic test in the community — for example, at free testing locations across the county.

Help A&F 'Focus Forward' and Win Prizes

After a challenging year, it's time to "Focus Forward." But first we need to look back. On Wednesday, April 7, Administration and Finance will launch the next iteration of its annual customer satisfaction survey. Renamed Focus Forward, the survey will reach out to A&F constituents for feedback on the division's services over the past year. Responses will provide the division with valuable feedback needed for continuous improvement. Open to all faculty, staff and students, Focus Forward will remain open through April 30. While the survey covers every unit and department within A&F, campus community members are being asked to complete the sections relevant to them. For every section that participants complete, they will be entered into a drawing for an iPad Mini and more than 60 other prizes. More information on the survey, prizes and a link to participate are available at afd.calpoly.edu/survey.

April is Sexual Assault Awareness and Prevention Month

Safer will host Sexual Assault Awareness and Prevention Month in April with the theme "Connected in our Collective Power." Throughout the month, topics will be centered on raising marginalized voices, identifying paths to healing, and developing strategies for collective care. Ignacio Rivera, founder and director of the Heal Project, will lead a workshop titled "Sexual Liberation at the Intersections" from 4-5 p.m. Tuesday, April 13. Take Back the Night, an international movement to end sexual violence and one of Safer's cornerstone events, will take place on Thursday, April 29. The event is being adapted to a virtual format and will feature programming throughout the day, including healing workshops and a survivor "speak out." Safer encourages the campus community to get involved on social media for continued education and opportunities to win some great prizes. Follow Safer on Instagram @safercalpoly. Visit <https://safer.calpoly.edu/saam> for a full list of events and registration information.

PolyCultural Weekend Reaches Future Students Virtually April 2 and 3

For more than 15 years, PolyCultural Weekend has helped future students feel more at home on Cal Poly's campus months before they start their first quarter. The student-led event gives prospective Mustangs from underrepresented backgrounds — which include factors such as race and ethnicity, gender and socioeconomic status — a chance to spend three days on campus and have a 360-degree experience of what it's like to be part of Cal Poly. "It's about centering diversity, equity and inclusion together so that a diverse student population can see themselves here, living here and thriving here," says Beya Makekau, director of Student Diversity and Belonging. On April 2 and 3, PolyCultural Weekend organizers are preparing to meet students and supporters in a moment unlike any other. The weekend will feature live Zoom events, chat apps, a virtual club showcase, a Central Coast culinary tour through video blogs, and music and dance performances from culturally rooted organizations throughout campus. For more information on this year's event and the student team making it happen, visit <https://multicultural.calpoly.edu/PolyCulturalWeekend> or read a story on Cal Poly News at <https://www.calpoly.edu/news/making-sure-they-can-thrive-17th-poly-cultural-weekend-reaches-future-students-virtually>.

CSU To Host Systemwide Vaccine Webinar on March 30

CSU Systemwide Human Resources invites all employees to join a live webinar from 11 a.m. to noon Tuesday, March 30, on "COVID Vaccinations: An Overview of the Various Vaccinations and Their Benefits." With COVID-19 vaccine rollout now underway, there has never been a more important time to learn about the vaccinations and speak to common questions and concerns. Dr. John Rott, regional assistant medical director at Kaiser Permanente, will speak about updates to our nation's COVID-19 strategy and address several of the most frequently asked questions they've received related to the vaccine. Submit questions by emailing them now to hadmin@calstate.edu. No registration is required. Join the live broadcast on March 30 at <https://www2.calstate.edu/Pages/livestream.aspx>. Closed captioning will be provided. The webinar will be recorded and available to view until April 15.

Cal Poly Employees Eligible for COVID-19 Vaccines, Second-Dose Appointments Available

All current employees, including student employees, who want to be vaccinated are eligible for COVID-19 vaccines in San Luis Obispo County. The county's eligibility also includes a list of specific employment sectors, residents who are 50 and older, and residents with specific medical conditions or disabilities. Those eligible can look for first-dose appointments at several local pharmacies or through San Luis Obispo County's Vaccine Appointment Registry for appointments at one of three local vaccine clinics. Employees can sign up for the county's registry online at <https://www.recover slo.org/en/vaccine-registration.aspx> or by calling the County Phone Assistance Center at 805-543-2444 or 805-781-4280 (seven days a week, 8 a.m. to 5 p.m.). University employees who live outside the county are still eligible for a vaccine at a county site based on their employment at Cal Poly. Review these frequently asked questions on Cal Poly's vaccine page at <https://coronavirus.calpoly.edu/covid-19-vaccine> to help prepare for your appointment and prepare the right documents to verify employment. SLO County Public Health advises everyone to plan to receive their second dose, if necessary, wherever they received their first dose. Second-dose appointments through a county-run vaccine clinic can be scheduled on the [recover slo.org](https://www.recover slo.org) website and should follow the timeline given to you at your first-dose appointment. Employees are highly encouraged to receive the vaccine when eligible but are not currently required to be vaccinated. Learn more about the vaccines and the vaccination process on county public health's frequently asked questions page at <https://www.recover slo.org/en/vaccine-faqs.aspx> and the Cal Poly coronavirus website's vaccine page for more information.

COVID-19 Vaccine Fact Check: Will Vaccines Cause Me to Test Positive for COVID-19?

Welcome to the COVID-19 Vaccine Fact Check, weekly insights on the COVID-19 vaccines presented by Campus Health and Wellbeing. This week's fact check answers this question: Will the vaccine cause me to test positive for COVID-19? The CDC says no. Neither the recently authorized and recommended vaccines nor the other COVID-19 vaccines currently in clinical trials in the United States can cause you to test positive on viral tests, which are used to see if you have a current infection. If your body develops an immune response — the goal of vaccination — there is a possibility you may test positive on some antibody tests. To learn more about vaccines available in SLO County, visit the RecoverSLO.org website's frequently asked questions page at <https://www.recover slo.org/en/vaccine-faqs.aspx>. Look for more COVID Vaccine Fact Check posts in future editions of the Cal Poly Report.
