#### **Cal Poly Decreases Recycling Contamination with Help from CalRecycle Grant**

Cal Poly has decreased recycling contamination on campus by 15%, thanks to CalRecycle state grant funds totaling \$225,000. The CalRecycle grant, awarded in late 2019, provided the funds to improve beverage container recycling as part of the university's zero-waste goals. These funds helped the campus decrease recycling contamination from 37% in 2019 to 22% in 2021. "We are very excited to see the needle move in a positive direction to reduce waste on campus," said Anastasia Nicole, CalRecycle grant lead and Cal Poly's zero waste coordinator for Facilities Management and Development. Contamination in recycle bins is a considerable obstacle to a successful recycling program; if recycling is not placed in the correct bins, it winds up in a landfill, Nicole said. "It was a lot of hard work," said Chloe Peng, a student assistant spearheading the marketing efforts. "But it was all worth it knowing I was making a difference. It was definitely time well spent."
